

Healing Touch & Raindrop Therapy

Becky Lee Osterback, B.S.N., RN is a Healing Touch Clinician (American Holistic Nursing Association). She uses hands-on treatments and energy-based techniques with the best of technology. The nursing profession first designed Healing Touch with a clinical focus that uses touch to promote physical, emotional, mental and spiritual health.

Healing Touch is a therapy that helps to restore and balance energy that has been depleted due to stress, illness, injury, grief, medical conditions, surgery or medical treatments such as chemotherapy and radiation. Practitioners consciously use their hands in a heart-centered and intentional way to support and facilitate physical, emotional, mental and spiritual health. Healing Touch reduces pain and anxiety, and offers comfort and relief when nothing else seems to help.

Raindrop Therapy is a spa-like experience combining a full body massage & Healing Touch. Therapeutic-grade essential oils that are antiviral & anti-inflammatory boosting your immune system are applied on various areas of the body to bring structural and electrical alignment. The process helps your body heal itself. It is designed to bring balance to the body with its relaxing, mild application.

Becky Lee Osterback, B.S.N, R.N.

The Singing Nurse founded Healing from the Heart, a non-profit Organization out of her own need for treatment that reached beyond customary medical treatment.

Results from her accident left her in pain with a bleak prognosis. Having pursued traditional medical avenues, other medical resources were her only opinions.

“Healing Touch” was one of those modalities that God used in “Becky Lee’s” care, as she is a Healing Touch Clinician.

Micro VAS Vascular System is a non-invasive device that delivers a powerful, deeply penetrating, electrical waveform, causes blood to pump more efficiently through the micro circulation (drain the venous beds and raise tissue oxygen levels) in damaged tissue to accelerate the healing process. The therapeutic effects are dramatic and lasting.

Micro VAS is an important new tool in the treatment of neuropathy, non-healing wounds, repetitive motion disorders, fibromyalgia, sports injuries and many other conditions related to vascular insufficiency.

- Strengthens and enhances posture
- Increases bone strength and density
- Increases tendon strength
- Enhances balance, coordination and post ACL repair

Lipo Laser is a non-invasive body forming technology that heats tissue, and relieves pain. The Lipo Laser is a procedure that refines, reshapes and revives your body. It is a totally pain free treatment for fat reduction and aesthetic body contouring that requires no shots or surgery.

The Bemer treatment system represents the most researched and most effective physical treatment method used in complementary and preventative medicine today. The core of Bemer technology is a multi-dimensional signal structure, which effectively stimulates restricted or defective microcirculation. Consequently, it supports one of the most important regulation mechanisms in the human body for prevention, healing, recovery and regenerative processes.
